		Expected outcome	<p>The programme is one year of duration and is further subdivided into two semesters. At the end of the programme, the students learn the basics of library and information science in terms of theory and practice with all its latest trends. The Learning Material in the course is so diversified that the graduate can seek jobs in several fields i.e. book publishing market, archaeology and museums etc. The students are trained to handle all kinds of information environments both traditional and modern. They will be imparted knowledge to understand libraries and librarianship and to get acquainted with various standards and tools used in processing, managing and retrieving information resources. At the end of the programme, they can also evaluate programs and services using library automation.</p>

		Expected outcome	<p>The most important outcome for all our students is that they enthusiastically engage in learning what is known about our world and develop a passion for participating in pushing the boundaries of our knowledge even further. Physicists are renowned for the power of their problem-solving capabilities. Great emphasis and effort are spent on providing students with tools and methods to approach and solve increasingly challenging problems. These challenges will not only broaden and deepen students' skills but will amplify their drive to participate in discovery. They can become teachers, researchers, scientists and industrialists for higher studies in disciplines like Electronics, Material Science, Nuclear Studies, Nanomaterials, Solar studies and Spectroscopic studies.</p>

		Expected outcome	<p>This programme will provide a broad foundation in chemistry that stresses scientific reasoning and analytical problem-solving with a molecular perspective. Students obtain an ability to employ critical thinking and efficient problem-solving skills in the four basic areas of chemistry (inorganic, organic, physical and analytical). After successful completion of M.Sc Chemistry, a student can receive the ability to conduct experiments, analyze data, and interpret results, while observing responsible and ethical scientific conduct. Upon completion of their M.Sc in Chemistry, students will work as academic researchers or toxicologist pharmacologist or forensic scientists. M.Sc Chemistry opens up doors for service in a variety of industries including agriculture, medicine, energy and environment. Some of the areas of work available to students after the M.Sc Chemistry course are public relations, research centres, synthetic labs, chemical firms, academic institutions etc. Government jobs are varied and available in a wide range of organizations. Opportunities to graduates depend upon their interests, skill set and area of specialization.</p>

		Expected outcome	<p>One most important outcomes for all our students is that they enthusiastically engage in learning what is known about our world and develop a passion for participating in pushing the boundaries of our knowledge even further. Physicists are renowned for the power of their problem-solving capabilities. Great emphasis and effort are made to provide students with tools and methods to approach and solve increasingly challenging problems. These challenges will not only broaden and deepen students' skills but will amplify their drive to participate in discovery. They may become teachers, researchers, scientists, and industrialists. They could also opt for higher studies in disciplines like Electronics, Material Science, Nuclear Studies, Nano Materials, Solar studies and Spectroscopic studies.</p>
